Build a Virtual Private Cloud (VPC)

TP

tporchilai@gmail.com

☒ VPC only☐ VPC and more

Name tag - optional
Creates a tag with a key of 'Name' and a value that you specify.

IPv4 CIDR block [Info](#)
☒ IPv4 CIDR manual input
☐ IPAM-allocated IPv4 CIDR block

IPv4 CIDR

CIDR block size must be between /16 and /28.

IPv6 CIDR block [Info](#)
☒ No IPv6 CIDR block
☐ IPAM-allocated IPv6 CIDR block
☐ Amazon-provided IPv6 CIDR block
☐ IPv6 CIDR owned by me

Tenancy [Info](#)

Introducing Today's Project!

creating a vpc, subnet and internet gateway

What is Amazon VPC?

Amazon VPC is... a Id card for your data which is stored in the cloud ,and it is useful because... used to identify our data easily

In today's project, I used Amazon VPC to... crated the new VPC for my account

Personal reflection

This project took me... 40 mins

One thing I didn't expect in this project was... error message that i got in the subnet creation

Virtual Private Clouds (VPCs)

What I did in this step

creating vpc in aws console

How VPCs work

lock key for our folder

Why there is a default VPC in AWS accounts

while creating a account a public vpc is automatically creayed to my accoud

☒ VPC only ☐ VPC and more

Name tag - optional
Creates a tag with a key of 'Name' and a value that you specify.

Network VPC

IPv4 CIDR block [Info](#)

☒ IPv4 CIDR manual input
☐ IPAM-allocated IPv4 CIDR block

IPv4 CIDR

10.0.0.0/24

CIDR block size must be between /16 and /28.

IPv6 CIDR block [Info](#)

☒ No IPv6 CIDR block
☐ IPAM-allocated IPv6 CIDR block
☐ Amazon-provided IPv6 CIDR block
☐ IPv6 CIDR owned by me

Tenancy [Info](#)

Default

Defining IPv4 CIDR blocks

To set up my VPC, I had to define an IPv4 CIDR block, which is... a IP address

Subnets

What I did in this step

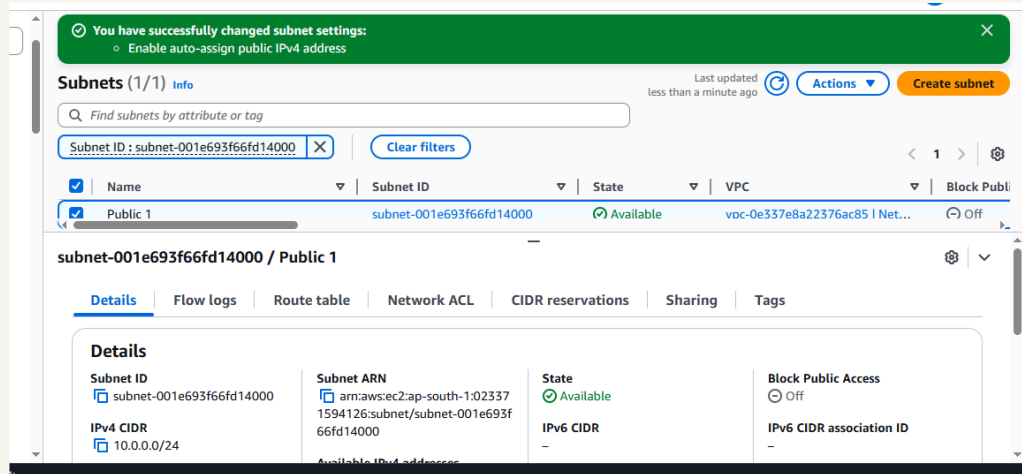

launching the subnet inside the VPC

Creating and configuring subnets

Subnets are... Group up the data which is present inside my VPC, there public and private subnets. There are already subnets existing in my account, one for every... yes, Default subnets will be created to your VPC,

Public vs private subnets

The difference between public and private subnets are... Private subnets connected directly to the internet where as private subnet don't have access to the internet, For a subnet to be considered public, it has to... connect to the Internet gateway

Auto-assigning public IPv4 addresses

Once I created my subnet, I enabled... auto assign public IPv4 address, This setting makes sure... so that... any Instances in the subnet will assign automatically to the subnets

Internet gateways

What I did in this step

In this step, I will... create a Internet Gateway, because... it act as a bridge between the internet and my VPC

Setting up internet gateways

Internet gateways are... connection to your VPC over internet

Attaching an internet gateway to a VPC means... giving aconnection to the internet and your VPC, If I missed this step... i cant able to comunicate with the internet

Using the AWS CLI

What I'm doing in this extension

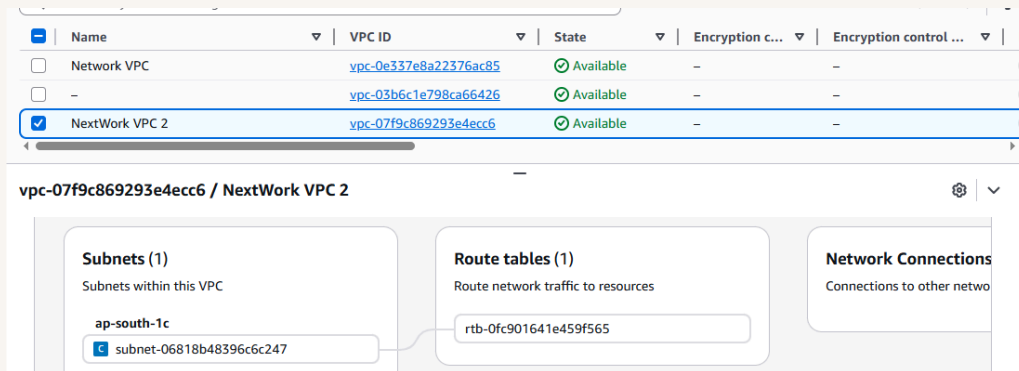

In this project extension, I will... Run AWS CLI to create VPC, Subnet and internetgateway , because... for understanding the CLI methode

Exploring CloudShell and CLI

VPC resources could also be created with CloudShell, which is... CLI is... speed and versatily for proffessional

Debugging my setup

To set up a VPC or a subnet, you can use the command... CIDR block for network verification, Make sure to avoid errors by including...CIDR block

Comparing CloudShell vs AWS Console

Compared to using the AWS Console, an advantage of using commands is... speed and versatile, An advantage of using the Console is... Overall, I preferred... CLI for professional
